DETAILED ACTION

Election/Restrictions

1. Claims 1-23 are pending in the application.
2. Claims 1-23 contain embodiments/examples directed to following patentably distinct species of the claims invention:
 - A. One embodiment drawn to an electro optical device comprising a connection terminal for external circuit including a controlling film and contact holes formed in the fourth interlayer insulating film, [figs. 15-16].
 - B. Another embodiment drawn to an electro optical device comprising a connection terminal for external circuit wherein there is no controlling film and the contact holes not formed in the third interlayer insulating film, [figs. 19-20].

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of claims is generic.

Applicant is advised that the reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent from or otherwise include all

Art Unit: 2871

the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
